APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do here grant the same, subject to the following limitations and conditions:

This primary permit is issued under the authority of NRS 533.440 (Secondary Applications are required for the use of the appropriated effluent) and is only a temporary allowance and the quantity granted may exceed the effluent discharged. The final water right obtained will be dependent upon the amount of effluent actually placed to beneficial use under the secondary permits. A totalizing meter must be installed at the discharge near the point of diversion and accurate measurements must be kept of effluent discharged. Granting of this permit is not intended in any way to waive or affect authority or requirements of appropriate water quality control agencies or regulations. This permit is further issued subject to the provisions of NRS 533.395 and the State retains the right to regulate the use of water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is further issued subject to the condition that any secondary permit issued under this permit will be for municipal purposes only and any injection, recharge or storage in the underground aquifer is not allowed.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 23.25 cubic feet per second, but not to exceed 13,450.0 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:
